

IFMA-CHICAGO OFFERS CREDIBILITY & CONTINUING EDUCATION TO ALL MEMBERS

The International Facility Management Association (IFMA) is the premier professional association for facility management profession with 17,000 members worldwide. We welcome you to our organization as a professional facility manager or associate who sells and serves the facility management industry.

The national award-winning Chicago Chapter of IFMA has been recognized for its excellence in programming. The programs - from formal facility tours to informal lunch-n-learn presentations- offers the ideal setting for any Chicago facility manager to network with other area facility managers and potential suppliers. Our newest passion is to educate a majority of its members for an opportunity to earn their "CFM" Certified Facility Manager designation. IFMA is the only organization who can give you this distinction through its tests and continuing education programs.

Incorporated in 1982, the Chicago Chapter continues to evolve and grow with the leadership of its voluntary Board of Directors elected each year. Educational programs and networking events are offered at a central loop location at least once-a-month which allows members easy access to a new skill. IFMA International recognized the Chicago Chapter for "Excellence in Programming" in 2003 because the topics of discussion provided by this chapter are always relevant to the times. Here are some examples of our programs in the past:

- *Space Design & Furniture – Making it all come together
- *Office of the Future
- *High Performance Buildings
- *Office Trends
- *Real Estate Leases
- *FM Best Practices and Panel Discussions
- *Facility Tours
- *Web Based Classes
- *CFM Classes
